SKILLS

- Openshift
- RHEL Linux
- Jenkins
- SonarQube
- Git and Github
- Github Actions
- Maven
- Bitbucket
- Bamboo
- Docker
- CircleCI
- Gitlab
- AWS
- Jira and Confluence
- Kubernetes

ACHIEVEMENTS

- EX200 - Red Hat Certified System Administrator
- DO280 - Red Hat Certified OpenShift Administrator
- Jira Fundamentals Badge
- Confluence Fundamentals Badge
- NVIDIA certified - Introduction to Networking
- Recognized as Star Trainer in July 2024

PROFILE

Skilled DevOps Engineer with 3+ years of hands-on experience supporting, automating and leveraging configuration management, CI/CD and DevOps processes. A confident individual with strong knowledge and a zest to continuously enhance technical expertise.

WORK EXPERIENCE

CYBAGE Software Pvt. Ltd
DevOps Engineer

JAN 2022 - PRESENT

- Installed, configured, and managed Red Hat OpenShift clusters, ensuring scalability, high availability, and optimal performance.
- Performed cluster initialization, networking setup, and managed nodes, pods, and other resources to support application deployments.
- Deployed and managed containerized applications using OpenShift Operators and Helm charts for streamlined operations.
- Implemented role-based access control (RBAC) to enforce security policies and manage user access effectively.
- Ensured compliance and vulnerability management by integrating tools like Trivy, Snyk, and SonarQube into DevSecOps pipelines.
- Monitored cluster health and application performance using OpenShift monitoring tools, including Prometheus and Grafana.
- Built custom dashboards for tools like Trivy to enhance vulnerability tracking and reporting.
- Automated build, test, and deployment processes using Jenkins with master-slave configurations and customized build jobs.
- Designed and implemented CI/CD pipelines using Jenkins, Docker, and Amazon S3 for efficient artifact storage and deployment.
- Configured and deployed GitLab CI/CD pipelines using GitLab Runner and GitHub Actions pipelines using GitHub Runner.
- Migrated CI/CD pipelines, including transitions from GitHub to GitLab and CircleCI to GitHub Actions.
- Integrated JFrog Artifactory with tools like Jenkins for seamless artifact management.
- Optimized development workflows by implementing best practices in DevOps and DevSecOps across multiple projects.
- Delivered comprehensive training programs on ALM tools such as Jira, Confluence, Maven, SonarQube, Jenkins, GitHub, and GitLab to both freshers and experienced professionals.
- Developed a training website to centralize training materials, including presentations, notes, bookmarks, calendars, and other resources.
